Complaint About Union Manufacturing

Roy Rednour (938-7709) called on January 3, 1984, to say that when he worked as a mill wright mechanic in the early 70's for Union Mfg., a toolbox Manufacturer, they dumped hundreds of gallons of TCE on the ground at the site. They did not use any impoundments, just surface disposal.

Union Mfg. is located just east of I-10 off Williams Field Rd. in an industrial park. It may be located on the Gila River Indian Reservation. There are many irrigation wells nearby as truck crops are grown there. A produce packer called Maggios is right next door and may have a well.

I would like the following information:

1. Is Union Mfg. on file with you Bureau?
2. Have any inspections or reports been conducted there?
3. Are they a TSD facility?
4. Would it be possible for your staff to conduct a site inspection?

I anticipate that I will sample nearby wells as soon as the laboratory analyses can be arranged. I will appreciate any site specific information you could provide and will inform you of the results.
